USP Roofing Compounds

USP 6400

USP 6400 Shingle Coating is a high performance coating compound specifically formulated for applications in the roofing shingle industry. By utilizing a unique blend of proprietary modifiers, anti-oxidant additives, and high quality asphalts, roofing customers will enjoy outstanding impact resistance and wind uplift resilience, as well as excellent granule adhesion, finished product durability, and scuff resistance.

Typical Properties

Softening Point, in °F.	215 - 240
Penetration @ 77°F, dmm.	15 - 30
Viscosity @400°F, Thermocel, cP.	150- 400
