

Engineered to Perform

At Polyco, we reimagine the use of resources to engineer longer lasting, high-performance products that power a circular economy. We continuously innovate to provide our roofing and paving partners products with more consistency and reliability. We use our deep expertise to create safer products that give our customers a strategic advantage in the field. With sustainability at the core of everything we do, Polyco is positioned to meet the needs of the future by enabling customers to optimize their asphalt supply today.

Advanced Asphalt Solutions. Enhanced by Science.

Polyco provides partners with sustainable, customized solutions that advance the performance of their products.

Rapid Digestion Process™

The only process in the market that completely digests recycled tire rubber and asphalt into a homogeneous, liquefied state.

SigmaBond

Powered by our proprietary Rapid Digestion Process, Sigmasbond is a innovative asphalt that enables hot mix contractors, shingle and roofing manufacturers the ability to enhance the performance of their products, sustainably.

Polyco Products

Our high-performance products are formulated and engineered to perfection in our world-class laboratories and exceed industry standards.

-  Concentrates & Additives
-  Adhesives
-  Coatings
-  Transportation

SigmaBond

RAPID DIGESTION PROCESS™

Polyco has reengineered the way rubber modified asphalt is formulated. Only our proprietary Rapid Digestion Process (RDP) completely digests recycled tire rubber and asphalt into a liquefied, homogeneous state — resulting in upcycled performance.

Enhance the sustainability of your asphalt mix without sacrificing performance.
